Subject: RE: Draft email for your review FW: Meeting with Frost St Parties

So, I was getting Paul Molinari (from John Prince's email) confused with Kevin Maldonado (representing Frost Street).

Subject: Draft email for your review FW: Meeting with Frost St Parties

Sharon – Below is my draft email. I'm leaving shortly so I won't get to send this out until next week. Let me know if you have any comments on the wording.

The cc's will be the Frost Street party attorneys. I'll also cc you on my reply.

Included below my draft is the original email received from Phil Coop yesterday so you can reference it in your review.

---DRAFT EMAIL---
Phil,

It is my current understanding that parties from within the New Cassel Industrial Area are coordinating with Bob Lucic to attend a meeting in our NY office on February 5th to discuss the remedy selected for Operable Unit 1 in the ROD dated September 30, 2013. Bob Lucic has scheduled this meeting with Sharon Kivowitz and it is our expectation that he will be sending her an agenda and attendee list soon.

In regards to topics A and B in your email below, these topics are outside EPA's oversight and as such, should be coordinated with NYSDEC.
Therefore, the remaining topic of EPA's remedy for OU1 can be discussed at the February 5th meeting.

Regards,
Jennifer LaPoma

Subject: RE: Meeting with Frost St Parties

Jennifer,

Thank you for your email. It is now I who must apologize for being slow in responding. The Frost Street Parties are interested in meeting with EPA and NYSDEC to discuss a comprehensive and coordinated remediation of contamination originating from the Frost Street Sites. One of their attorneys has already reached out to NYSDEC to let them know of our interest in meeting.

To address your questions:

Frost St would be represented by its attorneys John Privitera and Kevin Maldonado, myself as new technical consultant, and perhaps one or more of its Principals.

From EPA we would hope to have present the Project Managers and/or Technical Staff who will be developing the EPA's remedy for the plume south of Old Country Road and the EPA attorney, Sharon Kivowitz. As you will see from the proposed agenda below we believe that coordination of the EPA remedy and possible on-site remedies is important.

Similarly, we hope that NYSDEC representatives will include the Project Manager(s) and outside consultants for their

proposed deep remedy north of Old County Road and for the Frost Street site. This is necessary to have a full and open discussion on implementing a coordinated remedial program.

As to topics, we welcome your input as well as that of NYSDEC, but the items below would be important:

Summary of Existing Source Control Measures in place at the Frost Street Sites;
Summary of the three adjacent Remedial actions proposed/ordered for the chlorinated solvent plumes in the NCIA

- A. GCW Remedy ordered by NYSDEC for implementation by Frost Street Parties;
- B. GCW remedy deeper planned by NYSDEC (NYSDEC);
- C. EPA remedy south of Frost St (EPA)

Need to fill data gaps and produce a coordinated, single remedial action to remediate the Frost Street Plume.

We are happy to modify this agenda to incorporate any EPA or NYSDEC concerns, or proposed topics of discussion.

We are available on any day between February 3-6; Feb 10-11 and February 28th and possibly alternate dates that work for your schedule.

Thanks,
Phil Coop

Phil,

Apologies in advance for the delayed response, but I got your voicemail. Unfortunately, I will be in the field for another site the first week (and second) of December.

Could you, in your reply back, let me know:

- what the topics are that you would like to cover, purpose of the meeting
- who you would like to attend (i.e., technical staff, New York State, counsel)
- who will attending on behalf of the Frost Street parties
- availability in the mid-Jan to late-Feb time frame (Jan 14-17th won't work for EPA)

Thereafter, I'll send out your response to the team and get back to you with potential meeting dates.

Thanks,
Jennifer LaPoma

Subject: Meeting with Frost St Parties

Ms. Lapoma,

To confirm the voice message I left in your office this afternoon, I am requesting a meeting with you, and others at EOA as appropriate, in regard to the proposed plan EPA will be implementing at the New Cassel Industrial Area in New York. The Frost Street parties have been asked to implement a further remedial action by NYSDEC in connection with OU-2 and a meeting with you to understand in better detail how the various pieces fit together would be very helpful.

As I mentioned on the phone, the 16th of September works well for us and we are hoping that would be a good date for you as well. I will represent the Frost Street parties as a Project Manager and will be accompanied by their attorney.

I will be traveling next week but look forward to hearing from you. My contact information is below.

Thank you,

Phil Coop
